

City Ranger 3500 Snow Sweeper

The snow sweeper is perfect for the first layers of new snow. It is ready to clear up to 25-30 cm and works with an even speed of 15 km an hour. The snow sweeper is attached onto the front of the utility machine, allowing for the salt and sand spreader or the roller spreader to be attached on the back. Putting the two to work as a tandem unit on pavements, parking places, and other paved surfaces, they are cleared of snow and then sanded/salted for the safety of the pedestrians in one and the same operation.

It is half the work and twice the efficiency, as the snow sweeper is extremely thorough and efficient. It leaves absolutely no snow behind.

Sturdy construction

The sweeper is equipped with height adjustable stabilisers to reduce the wear and tear on the bristles. The snow sweeper is fitted on a strong framework in which the floating position – allowing the sweeper to neglect curbs and other obstacles on its way – is a built-in feature in the anchoring. The sweeper also has an integrated spatter guard to keep the dirt on the ground and protect the surroundings against splattering while working. The supporting strutt on both sides are for storage purposes.

With City Ranger 3500, attachment changeovers can be done in less than 10 minutes, which is the fastest changeover-time in this machine class.

Technical data

Snow Sweeper

Special features:

- Very efficient with newly fallen snow
- Manages up to 25-30 cm. snow
- Working speed of 15 km/h
- A good view from the driver's seat
- Height adjustable support wheels
- Floating position built into the anchoring of the frame
- Integrated spatter guard for protection of the surroundings is standard
- Support strutt on both sides, for brush protection while stored
- Integrated hydraulic motor inside the sweeper's cylinder

Technical Tips

The snow sweeper performs best when the bristles merely touch the surface - saving energy and minimising wear and tear at the same time

Dimensions

Attached:

Length	5,130 mm
Width	1,500 mm
Height	1,890 mm

Storage dimensions:

Length	1,120 mm
Width	1,500 mm
Height	825 mm

Technical data:

Weight	200 kg
Clearing width	1,300 mm
Sweeping capacity	6,500-19,500 m ² /h
Brush cylinder rpm	300 rpm
Brush diameter	600 mm
Ground clearance below brush	200 mm
Operating speed	15 km/h
