

# City Ranger 2250 All Purpose tipper trailer

*The all purpose tipper trailer is designed to make light work of transporting bulk loads such as park and garden refuse. The trailer has fixed headboard and sides and a drop tailboard. The standard loading capacity of 600 kg increases with the optional side extensions to 1.02 m<sup>3</sup>.*

Loading is done easily thanks to the low loading height of the trailer, and unloading follows hydraulically from the operator's seat.

The trailer comes standard with a support wheel, which is useful when dismantling and storing the trailer.

*When you change attachments, the City Ranger 2250 hydraulic hoses are connected at the turn of a handle!*

# Technical data

## All Purpose tipper trailer

### Special features

The tipper trailer features a strongly built steel chassis with fixed headboard and sides

### Optional equipment

The optional side extensions increase the volume of the trailer. The side extensions are 40 cm in the height.
