

City Ranger 2250 Mulch Mower and Rotary Mower 1600

The Nilfisk Outdoor mulch mower and rotary mower 1600 make it simple to mow even large areas of lawn in record time. The machine has a working width of 1610 mm, can operate at up to 12–13 km/h – if the terrain permits – and always produces an excellent result. This means that you can get a great deal done during a working day. As a rotary mower, the machine can deal with even the tallest, coarsest grass, also when wet. As a mulch mower, it cuts the grass several times, chopping it finely so that it disappears into the lawn. These fine cuttings make excellent natural fertiliser and provide good protection against moss. As an added benefit, there is no need to spend time collecting the grass cuttings.

It is simple to convert the machine from mulch mower to rotary mower and back again. In fact, everything about this mower is simple. The City Ranger 2250's articulated steering makes the machine very manoeuvrable, which means that it is easy to mow under bushes and between beds and flowers. The machine is also easy to operate on account of its excellent stability and its broad wheels. Service and cleaning are no problem thanks to the frame (supplied) for tilting and moving the mower. Even the noise level is low, so the mower is a pleasure to work with.

When you change attachments, the City Ranger 2250 hydraulic hoses are connected at the turn of a handle!

Technical data

Mulch Mower and Rotary Mower 1600

Special features

Excellent weight distribution and stability between the utility machine and the implement

Quick return to floating position after lift

Seat with pneumatic suspension (optional) for extra comfort

Operator-friendly with adjustable steering wheel and seat

The cutting guard has strengthened edges

Wheels with wide tread that leave less noticeable tracks in the grass

Cutting speed of up to 12–13 km/h

The mower can tilt up and rest on two support wheels – making cleaning and moving easy

Tilting frame supplied, so it is always easy to tilt the mower for cleaning, etc.

Extra equipment

Top filter: We recommend using a top filter to increase air intake, as this will protect the engine by preventing the radiator from becoming blocked. Top filters are available at all authorised Nilfisk Outdoor dealers

Mulch kit: The rotary mower can be changed into a mulch mower with a special kit, which is available from all authorised Nilfisk Outdoor dealers

Dimensions

Attached:

Length	3,050 mm
